

ALPI TUBE

Anastomosis Leakage Protective Ileostomy

The new frontier of ileostomy

- ① Blue tip and stripe, radiopaque along the entire length of the tube
- ② Patented, anti-kinking, non-collapsible “hot-air balloon” distal end with stabilization flanges
- ③ Large drainage holes
- ④ 20cc balloon
- ⑤ 20Fr silicon tube
- ⑥ External retention flange

In colorectal anastomoses, the ileostomy package on the percutaneous probe designed for this purpose (TPI) avoids the need for surgery and a further operation to close it

The Temporary Percutaneous Ileostomy (TPI) with ALPI tube has been shown to be safe and cost-effective, improving the patient's quality of life and, at the same time, reducing the costs associated with traditional surgery.

(see bibliography on the fourth page)

Probe with “showboat like” end

Eliminates the ostomy pouch

Removable without surgery

Easy to use

Ordering information

| Code | Description | Quantity per pack |
|----------|--|-------------------|
| 01035001 | Percutaneous ileostomy catheter with metallic stylet | 1 |
